Agilent Technologies

# AGILENT VACUUM VALVE SOLUTIONS

Agilent offers a range of vacuum valves that are engineered for reliability, performance, and value. These valves also optimize conductance, operate in a wide variety of applications, and employ a minimum of moving parts. This reduces wear and particle generation which contributes to their performance and reliability. Agilent valves are manufactured using the highest quality vacuum materials and provide a choice of actuation, and a variety of mounting flanges.

## Agilent High Performance Valves

We are pleased to add to our offering valve products manufactured to the highest international standards. The Series 26 Aluminum Block Valves, Series 12 Aluminum Gate Valves, and Series 54 UHV All-Metal Valves are the proven workhorses in their respective application segments. These are easily ordered with any of Agilent's vacuum pumps or other components.

### Agilent High Performance Valves

### Agilent Vacuum Valves

**Series 26 Aluminum Block Valves**  
Multi-purpose, high cycle life valves; position indication.

**Stainless Steel Tube Valves**  
Provide maximum conductance, low outgassing, and easy installation.

**Series 12 Aluminum Gate Valves**  
Robust, compact, high conductance means of isolating a high vacuum pump.

**Electromagnetic Block Valves**  
Rapid spring closure, service-free; eliminate the need for compressed air.

**Series 54 UHV All-Metal Valves**  
Extreme High Vacuum (XHV) compatible with dynamic all-metal sealing system.

**Variable Leak Valve**  
Unique device provides extremely precise control of gas flow to vacuum system.

# VACUUM VALVES

## Common Applications

- **Rough Vacuum**
  - Freeze drying
  - Food processing
  - Metal ore refining
  - Steam plant condensers
  - Vacuum distillation
- **Medium Vacuum**
  - Decorative coatings
  - Functional coatings
  - Chemical processes
  - Electron microscopes
  - Microscopy sample processing
- **High/Ultrahigh Vacuum**
  - Physics research
    - Optics
    - High energy
  - Semiconductor manufacturing
  - Electron tube manufacturing
  - Surface analysis (Auger Spectroscopy)
  - Molecular beam epitaxy
  - Outer space simulation

Vacuum Range	Valve Type	Housing Material	Size Range	Feed-through	Flange Options	Actuation	Page
<b>Primary/Medium to High Vacuum</b>

## AGILENT HIGH PERFORMANCE VALVES

### ▶ Agilent Aluminum Block Valves - Series 26

Thank you for choosing Agilent Valves. These valves are designed with the highest international vacuum standards and manufactured with uncompromising quality. We are confident that Agilent Valves will meet your most demanding vacuum control needs.

The valves are available in manually-operated and pneumatically-operated versions. The pneumatic valve is also available with a position indicator.

The position indicator delivers an electrical output signal when the valve cycles, and is user-set in either the normally-open or normally-closed position.

#### Technical Specifications

<b>Cycles until first service</b>	
with manual actuator	10 000
with closing spring	3 million
<b>Maximum temperature</b>	
Valve body	≤ 150 °C
Manual and pneumatic actuator	≤ 120 °C
Solenoid valve, position indicator	≤ 80 °C
<b>Material</b>	
Valve body aluminum	EN AW-6060 (3.3206)
Plate	AISI 316L (1.4404, 1.4435)
Bellows	AISI 316L (1.4404, 1.4435), AISI 316 Ti (1.4571)
<b>Seal: bonnet, plate</b>	FKM (Viton)
<b>Mounting orientation</b>	any
<b>Solenoid valve</b>	24 V DC, 115 V AC, 220 V AC; 2.5 W
<b>Position indicator: contact rating</b>	
Voltage	5–50 V AC / DC
Current	5–100 mA
<b>Valve position indication</b>	visual (mechanical)
<b>Leak rate: valve body, valve seat</b>	< 1 · 10 <sup>-9</sup> mbar ls <sup>-1</sup>
<b>Pressure range, series 26 (bellows)</b>	1 · 10 <sup>-8</sup> mbar to 5 bar (abs)
<b>Differential pressure on the plate</b>	
In opening direction	≤ 2.0 bar
In closing direction	≤ 5.0 bar
<b>Differential pressure at opening</b>	≤ 1 bar

## ▶ Agilent Aluminum Gate Valves - Series 12

Thank you for choosing Agilent Valves. These valves are designed with the highest international vacuum standards and manufactured with uncompromising quality. We are confident that Agilent Valves will meet your most demanding vacuum control needs.

The valves are available in manual, push-rod operation and double acting pneumatic operation. The pneumatic valves are available with solenoid (pilot) valves at 115 VAC, 220 VAC and 24 VDC, and a position indicator. See operator's manual for more information.

## ▶ Agilent UHV All Metal Valves - Series 54

Thank you for choosing Agilent's High Performance Valves. These valves are designed with the highest international vacuum standards and manufactured with uncompromising quality. We are confident that you will find these valves meet your most demanding vacuum control needs.

The valves are manually operated with a standard Hex wrench, so no Torque Wrench is required. Thanks to the "hard-on-hard" metal seals, these valves can be operated thousands of times before requiring maintenance.

### Technical Specifications

<b>Leak rate: valve body, valve seat</b>	$< 1 \cdot 10^{-10}$ mbar ls <sup>-1</sup>
<b>Pressure range</b>	XHV to 2 bar (abs)
<b>Differential pressure on the gate</b>	≤ 2 bar
<b>Differential pressure at opening</b>	≤ 1 bar*
<b>Lifetime</b>	≥ 1000 cycles
<b>Bake-out temperature**</b>	≤ 300 °C open and closed
<b>Heating and cooling rate</b>	≤ 60 °C h <sup>-1</sup>
<b>Material</b>	valve body, mechanism, bellows AISI 316L (1.4404, 1.4435)
<b>Seal: bonnet, plate</b>	metal
<b>Feedthrough</b>	bellows
<b>Mounting orientation</b>	any
<b>Valve position indication</b>	visual (mechanical)
<b>Conductance (molecular flow)</b>	NW 16: 5 ls <sup>-1</sup> / NW 40: 50 ls <sup>-1</sup>
<b>Closing force</b>	closes at a mechanical stop
<b>Weight: NW 16 / 40</b>	kg (lbs) 0.4 (0.9) / 1.9 (4.2)

\* > 1 bar with reduced number of cycles

\*\* Maximum values: depending on operating conditions and sealing materials

# AGILENT HIGH PERFORMANCE VALVES

## Features

- Body material: stainless steel
- FLEX VATRING configuration: see below
- Sealing surfaces are only elastically deformed
- Convenient operation with a standard hexagon wrench – no torque wrench required
- High conductance
- FLEX VATRING exchangeable twice

## FLEX VATRING

This dynamic, all-metal sealing system is characterized by consistent sealing and closing forces. It enables achieving high sealing forces with comparably low axial forces. The seal mating surfaces are in stainless steel, and deformed elastically only.

The FLEX VATRING system is suitable for extreme UHV. It may be baked to 300 °C in open and closed position and reaches a lifetime of > 1 000 cycles if operated under clean conditions.

## STAINLESS STEEL TUBE VALVES

### ▶ Agilent Stainless Steel Valves

Agilent's family of vacuum stainless steel tube and in-line valves are designed to connect our rough vacuum and high vacuum pumps to your system. Delivering maximum conductance and sized for easy, convenient installation, these valves are ideally suited for systems requiring high reliability with low outgassing.

Excellent low outgassing characteristics are derived from the valve's fusion welded 304 stainless steel body, welded AM-350 stainless steel nesting bellows and small cross section elastomers and do not contain any blind internal cavities.

In combination with our popular hardware products, the new stainless steel valves offer a complete, bundled solution for

your vacuum system, making it possible for convenient one-stop shopping for everything required to connect Agilent vacuum pumps to your system.

#### A selection of port mounts...

Standard port mounts include:

- **Conflat metal seal flanges**, recommended for ultra-high vacuum service
- **KF and ISO flanges** for quick elastomer seal flanges, ideal for high vacuum applications that require frequent assembly and disassembly. See range of sizes in specifications table
- **Solenoids and position indicators** are optional and are sold separately.

## Ordering Information

### Ordering Instructions:

- Use only the Product Number list in the Product Number column.
- Numbers in the Option Number column are for reference only; use Short Description for ordering options.

**Example Order:** for a right angle, 1 1/3" pneumatic valve with position indicator for the valve, and a spare position indicator:

*Item 1:*

X3200A: Agilent Stainless Steel Tube Valve, Right Angle

Option: Pneumatically Operated, 1 1/3" ConFlat (021)

Option: Position indicator with LED light (060)

*Item 2:*

X3200-63000: Position indicator (as a separate spare part)

**Note:** Items are delivered as separate items in the same box, for assembly upon arrival.

For assistance with assembly, please see the video on **Agilent Chem Vacuum YouTube Channel**.

Configuration	Product Number	Option Number	Actuation	Size	Flange	Short Description

## VARIABLE LEAK VALVES

### ► Agilent Variable Leak Valve

	A	B	C	D	E	F	G	H
mm	67	70	44	44	33	114	39	32
Inches	2 <sup>21</sup> / <sub>34</sub>	2 <sup>3</sup> / <sub>4</sub>	1 <sup>3</sup> / <sub>4</sub>	1 <sup>3</sup> / <sub>4</sub>	1 <sup>5</sup> / <sub>16</sub>	4 <sup>1</sup> / <sub>2</sub>	1 <sup>17</sup> / <sub>32</sub>	1 <sup>1</sup> / <sub>4</sub>

The variable leak valve includes a movable piston with an optically flat sapphire that meets a captured metal gasket. This forms a seal completely free from friction, seizing, and shear. The sapphire's movement is controlled through a threaded shaft-and-lever mechanism which provides a mechanical advantage of 13,000 to 1.

### Technical Specifications

<b>Controlled leak rate</b>	10 <sup>-10</sup> Torr-l/sec (minimum)
<b>Vacuum range</b>	Atmosphere to below 10 <sup>-11</sup> Torr (mbar)
<b>Leak rate</b>	No leak detectable on a helium mass spectrometer leak detector with sensitivity of 1 x 10 <sup>-10</sup> std cc/sec
<b>Max flow conductance</b>	6 l/m
<b>Bakeable to –</b>	450 °C
